

# GENERAL LANDSCAPING COMMERCIAL

BFA routinely creates Landscaping Plans in-house for small commercial developments. BFA's designs and plant selection are based on site aesthetics, functionality, curb appeal, and plant hardiness for the specific application. For larger developments, or more intensive landscaped areas, BFA has excellent relationships with qualified Landscape Architect subconsultants. Landscape Technologies and Gateway Design Studio, LLC both work closely with BFA to incorporate detailed civil design plans with attractive and sustainable plantings, vegetation, and landscape features ranging from commercial properties, parks, and bioretention basins.
