*Additional scope was added throughout the project

BFA was asked to create a minor subdivision plat as well as a re-subdivision for our client. The client already had two (2) lots created, but wanted to adjust the initial lot lines; adding two (2) additional lots, common ground area, and a road easement to access the river below. This project required setting up a base station to gather data.

Sketch

"Everybody I worked with at BFA were professional, knowledgeable and patient. In today's world, these are qualities that are hard to find individually and collectively as an organization. Thank you!"
